REMARKS

This is UNEVALUATED Information

25X1

On 20 November 1953, 25 biplanes [redacted] were observed 25X1
 at Biala Podlaska (S 53/M 46) airfield. There was no air activity. ¹ Only one
 hangar existed at the field. Next to this hangar there were foundations apparently
 for two additional hangars. Construction work continued on 6 three-story quartering
 buildings in the northwestern corner of the field. The buildings, each about 40
 meters long, were completed almost up to the roof. ²

1. [redacted] Comment. Biala Podlaska airfield is still occupied by a Polish flying school.
2. [redacted] Comment. It has not been determined whether the foundations for new hangars 25X1
 are located east or west of the completed hangar.
